

To order blood tests privately in Australia, there are a couple of options. You may be able to request them from your own GP, or your place of work, or you can request them privately from an online lab such as **i-screen** or **imedical**.

<https://www.i-screen.com.au/>

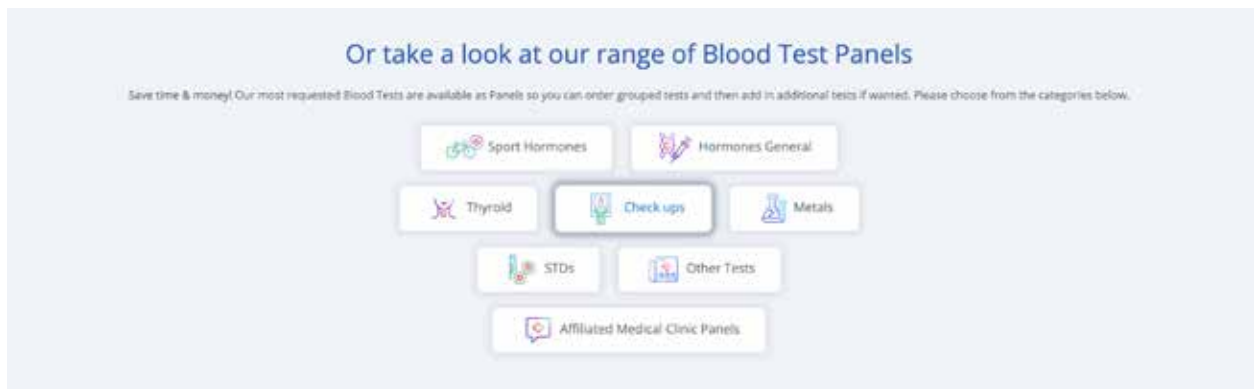

<https://imedical.com.au/>

Below are the details for **imedical** –they are a little cheaper and have a panel that includes all the tests you need for CHIP (Lipid panel and fasting blood glucose), as well as a few others. This saves time compiling tests.

1. Click on link <https://imedical.com.au/>
2. Select **order online blood tests** (in the skyblue coloured box).
3. Scroll down to **range of blood test panels**.

4. Select **checkups**. Scroll down to **Comprehensive Metabolic panel**.
5. Select add to cart. (Note if there are any other labs test you want to have done – select **+extra tests**. There are costs to these, but they clearly show what these are).
6. Go the checkout cart, complete details and make payment.
7. The lab form will be emailed to you immediately. Take this to the correct Lab **NOTE check here for collection centres:** <https://imedical.com.au/order/collection-centres>
8. Be mindful of any fasting requirements.
9. The results are emailed directly back to you.
